

## PUMPKIN MATH

Γράψε τους αριθμούς της πρώτης  
κολοκύθας σε εκατοντάδες, δεκάδες  
και μονάδες όπως στο παράδειγμα.

$$\begin{array}{c} \text{Pumpkin} \\ 432 \end{array} = \begin{array}{c} \text{Pumpkin} \\ 400 \end{array} + \begin{array}{c} \text{Pumpkin} \\ 30 \end{array} + \begin{array}{c} \text{Pumpkin} \\ 2 \end{array}$$

$$\begin{array}{c} \text{Pumpkin} \\ 315 \end{array} = \begin{array}{c} \text{Pumpkin} \\ \underline{\hspace{1cm}} \end{array} + \begin{array}{c} \text{Pumpkin} \\ \underline{\hspace{1cm}} \end{array} + \begin{array}{c} \text{Pumpkin} \\ \underline{\hspace{1cm}} \end{array}$$

$$\begin{array}{c} \text{Pumpkin} \\ 376 \end{array} = \begin{array}{c} \text{Pumpkin} \\ \underline{\hspace{1cm}} \end{array} + \begin{array}{c} \text{Pumpkin} \\ \underline{\hspace{1cm}} \end{array} + \begin{array}{c} \text{Pumpkin} \\ \underline{\hspace{1cm}} \end{array}$$

$$\begin{array}{c} \text{Pumpkin} \\ 749 \end{array} = \begin{array}{c} \text{Pumpkin} \\ \underline{\hspace{1cm}} \end{array} + \begin{array}{c} \text{Pumpkin} \\ \underline{\hspace{1cm}} \end{array} + \begin{array}{c} \text{Pumpkin} \\ \underline{\hspace{1cm}} \end{array}$$

 286 =  +  + 

 870 =  +  + 

 107 =  +  + 

 457 =  +  + 

 891 =  +  +
