## All about Halloween!

Read the following text and and answer the questions based on the information given.

Halloween is a spooky and exciting holiday that happens every year on October 31st. It's a day when children and grown-ups dress up in costumes, go trick-or-treating, and have lots of fun!

People love to decorate their houses with spider webs, pumpkins and scary characters like ghosts, and witches. Some houses even have scary sounds and eerie lights that make Halloween extra special.

One of the best parts of Halloween is choosing a costume. Kids can be anything they want, like superheroes, animals, or even their favorite characters from books and movies. Once they dress up in costumes they go from door to door, saying "Trick or Treat!" When they do, they receive candies and treats from their neighbors. If they don't get candy, they could play a harmless trick, like telling a funny joke. However, most people are happy to give out treats!

Halloween is also a time for fun games and activities. There's bobbing for apples, where you try to grab an apple floating in water using just your mouth. And let's not forget pumpkin carving! You can turn an ordinary pumpkin into a spooky face or a friendly design with a candle inside.

When is Halloween celebrated?
